Canyon Rock Estate

Classic Series

About This Product

The Canyon Rock paver is tumbled with a weathered stone texture on top. The tumbling softens edges and creates a rustic appearance. Available in many popular colors to complement any decor and landscape. Virtually maintenance-free and ecologically friendly — a perfect choice for homeowners who want dramatic character.

PERMEABLE PAVERS

Plaza Stone — Textured

About This Product

The Plaza Textured Paver shares the same versatile dimensions as the Smooth version but features a rich, deeply textured surface that adds visual depth and improved slip resistance. The textured finish is perfect for high-traffic commercial areas and outdoor spaces where traction and aesthetics both matter.

"Ideal for commercial plazas, public walkways, and upscale residential projects where a bold, clean statement is desired."

HYDROFLO®
Advanced Permeable
Paver System

Turfstone Permeable

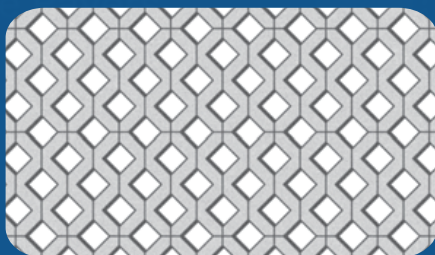

While others have only recently come to value the importance of permeable pavers, Pacific Interlock Pavingstone introduced the Turfstone to Northern California over two decades ago. The Turfstone is a wide-gap permeable paver system — different from HydroFlo®. Water flows through the large gaps between pavers filled with grass or gravel.

"Turfstone is a wide-gap permeable system — NOT available in HydroFlo® format. The gaps can be filled with grass, gravel, or left open."

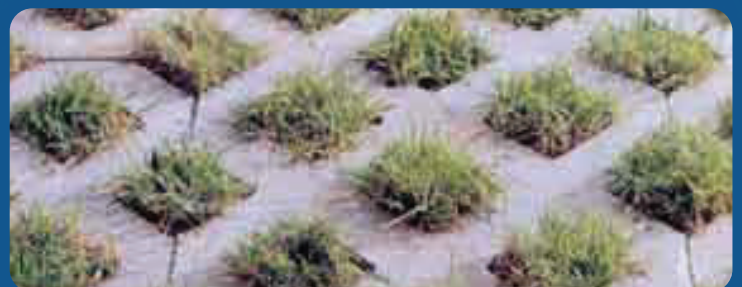

Product Specifications

DIMENSIONS	24.00 × 16.00 × 3.125"
COVERAGE PER PALLET	1 turfstone = 2.60 sq.ft. 40 stones
COVERAGE / PALLET	104 sq.ft. per pallet

PER PALLET	240 stones
COVERAGE / PALLET	100 sq.ft. per pallet
PERMEABILITY SYSTEM	Range: 0 to 26.5% by layout Wide-gap permeable (not HydroFlo®)

About This Product

The EcoStone permeable paver was added to Pacific Interlock's lineup to complement the Turfstone. Whatever your permeable paver needs are, come to the leader — Pacific Interlock Pavingstone. The EcoStone is a wide-gap permeable system — different from HydroFlo®. Water flows through the gaps, not through the paver itself.

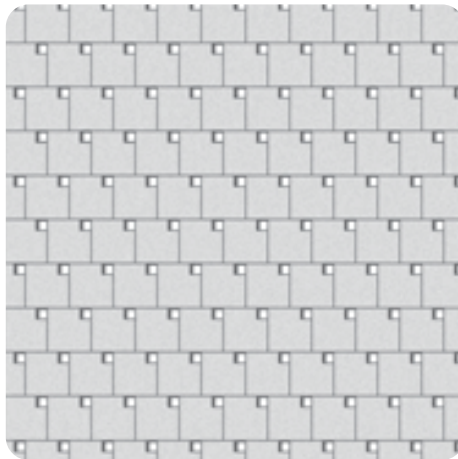

"EcoStone is a wide-gap permeable system — NOT available in HydroFlo® format. Permeability range: 0 to 26.5% depending on pattern layout."

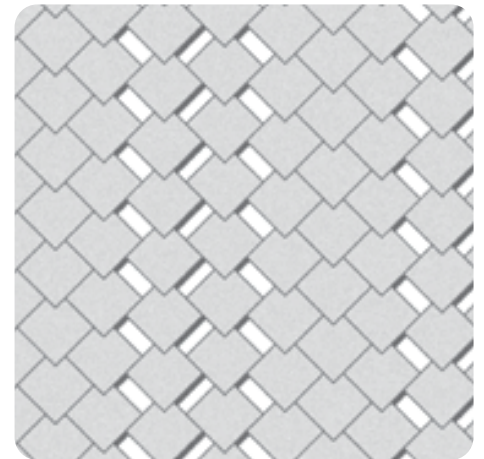

Pattern Styles

RUNNINGBOND **HERRINGBONE** **OLD TOWN**
STEP RUNNING BOND

About This Product

The Rustic Cobble is a tumbled paver – a completely different style from the standard cobble. The tumbling process softens edges and creates a worn, aged appearance. Available in three sizes: Rustic Jumbo (9×12), Rustic Large (6×9), and Rustic Medium (6×6). Pacific Interlock has manufactured the Rustic Cobble longer than anyone in California.

"The Rustic Cobble's tumbled finish gives it the look of authentic old-world cobblestones – perfect for creating a European-style courtyard or pathway."

04 Technical Guides

Installation specifications for Standard and HydroFlo permeable paver systems. Always consult a certified soil engineer

Standard Paver Installation Guide

60MM AND 80MM

Cross Section Typical Installation - Per ICPI Standards

60MM - PATIOS AND SIDEWALKS	
▶ Paver	2 3/8in
▶ Sand Bed	1" Sand
▶ Base Rock	3-4in Compacted
▶ Subgrade	Existing Soil

80MM - PATIOS AND SIDEWALKS	
▶ Paver	3 1/8in
▶ Sand Bed	1" Sand
▶ Base Rock	3-4in Compacted
▶ Subgrade	Existing Soil

60MM - DRIVEWAYS	
▶ Paver	2 3/8in
▶ Sand Bed	1" Sand
▶ Base Rock	4-7in Compacted
▶ Subgrade	Existing Soil

80MM - DRIVEWAYS	
▶ Paver	3 1/8in
▶ Sand Bed	1" Sand
▶ Base Rock	4-7in Compacted
▶ Subgrade	Existing Soil

Note: Standard thickness 2.375in (60mm). By special order, also available in 3.125in (80mm). For driveways, heavier base rock required. Always consult a professional installer.

HydroFlo Installation Guide

PERMEABLE PAVERS

In fill joint material ASTM-C33

Materials and Depth Specifications - Per ICPI (Interlocking Concrete Paving Institute)

BEDDING COURSE	1in-2in	Materials and Depth Specifications - Per ICPI (Interlocking Concrete Paving Institute)
BASE DEPT	X-4in	#57 Med Choker Stone (+/- 1/2in Rock) - Not to exceed 4in per ICPI - Point Fill: ASTM C53
SUB BASE DEPTH	6in-27.5in	#2 Large Choker Stone (2in-2.5in Rock) - 6in to 27.5in MAX per ICPI

IMPORTANT DRAINAGE FACTORS - CONSULT SOIL ENGINEER

- Land use
- Soil type
- Slope
- Topography
- Vegetation
- Drainage area and pattern
- Basin shape
- Natural conditions (ponds, etc.)

Please consult a certified soil engineer prior to installation. Permeability can range from 0 to 26.5% depending upon pattern layout.
