Notice: All Pacific interlock Concrete interlocking Paving Stones are manufactured to meet the A.S.T.M. C-936 Standard Specification for Solid Concrete Interlocking Paving Units. Colors are shown as accurately as possible, but due to variables in the printing process and in materials, photos should not be used for final selection. Efflorescence is a white haze of powder-like deposit that may appear on concrete pavers and is not a defect. It is inherent in all cement based products and will typically disappear over time.

*One Inch Pavers
Specialty Stones*

*Enhance your image ...
Pacific Interlock Pavingstone creates one of the most unique pavers ever manufactured — 1" Paver Tiles! Both beautiful and durable, these are installed onto an existing concrete patio, walkway, driveway, or porch using thinset or masonry adhesive, thereby making a more economical installation. This cost effective method adds a beautiful new look and durability to an existing paved surface in either a residential or commercial setting.*
